

**Amendments to the Claims:**

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1. (Previously Presented) A document data transmission device comprising:
  - storage means for storing plural documents including plural pages;
  - the storage means further storing plural summary data corresponding to the plural documents, each summary data including information showing which page contains what contents of information;
  - page data transmission request receiving means for receiving a page data transmission request transmitted from a user terminal, requesting to transmit specific page contained in a specific document selected among the plural documents stored in the storage means;
  - page data transmitting means for transmitting the specific page contained in the specific document to the user terminal, on the basis of the page data transmission request received by the page data transmission request receiving means;
  - summary data transmission request receiving means for receiving summary data transmission request transmitted from the user terminal, requesting to transmit a specific summary data selected among the plural summary data stored in the storage means; and
  - summary data transmitting means for transmitting the specific summary data to the user terminal, on the basis of the summary data transmission request received by the summary data transmission request receiving means, wherein the user terminal displays the specific summary data so that a user can select the specific page that includes contents of information of interest to the user.
2. (Canceled)

3. (Previously Presented) A document data transmission device according to claim 1, further comprising:

billing amount calculating means for calculating a billing amount charged to a transmission of the specific page and to a transmission of the summary data, on the basis of a unit price charged to a transmission of a unit data quantity of the specific page and a unit price charged to a transmission of a unit data quantity of the summary data.

4. (Previously Presented) A document data transmission reception system comprising:

the document data transmission device according to Claim 1; and

a user terminal for transmitting a page data transmission request requesting to transmit the specific page to the document data transmission device through a ground-based network and receiving the specific page transmitted from the document data transmission device through a satellite network.

5. (Previously Presented) A document data transmission reception system comprising:

the document data transmission device according to claim 1; and

a user terminal for transmitting a summary data transmission request requesting to transmit the specific summary data to the document data transmission device, and receiving the specific summary data transmitted from the document data transmission device.

6. (Previously Presented) A document data transmission method for transmitting document data from a document data transmission device having storage means for storing plural documents including plural pages, the storage means further stores plural summary data corresponding to each of the plural documents, each summary data including information showing which page contains what contents of information, the method comprising:

receiving a page data transmission request transmitted from a user terminal,  
requesting to transmit specific page contained in specific document selected among the plural  
documents stored in the storage means;

transmitting the specific page contained in the specific document to the user  
terminal, on the basis of the received page data transmission request;

receiving a summary data transmission request transmitted from the user  
terminal, requesting to transmit specific summary data selected among the plural summary  
data stored in the storage means; and

transmitting the specific summary data to the user terminal, on the basis of the  
received summary data transmission request, wherein the user terminal displays the specific  
summary data so that a user can select the specific page that includes contents of information  
of interest to the user.

7. (Canceled)

8. (Previously Presented) A document data transmission method according to  
claim 6, further comprising:

calculating a billing amount charged to a transmission of the specific page and  
to a transmission of the summary data, on the basis of a unit price charged to a transmission  
of a unit data quantity of the specific page and a unit price charged to a transmission of a unit  
data quantity of the summary data.

9. (Previously Presented) A document data transmission system comprising:  
storage means for storing plural documents including one or plural pages and  
plural summary data including contents information of each of the plural document data  
pieces,

a user terminal for transmitting a page data transmission request requesting to transmit the specific page to the document data transmission device through a ground-based network,

page data transmission request receiving means for receiving a page data transmission request transmitted from a user terminal, requesting to transmit specific page data contained in specific document data selected among the plural document data pieces stored in the storage means,

page data transmitting means for transmitting the specific page data contained in the specific document data to the user terminal through a satellite network, on the basis of the page data transmission request received by the page data transmission request receiving means.

10. (Canceled)

11. (Previously Presented) The document data transmission reception system of claim 4, wherein the ground-based network comprises the Internet.

12. (Canceled)

13. (Previously Presented) The document data transmission device of claim 1, wherein each page corresponds to at least one of data to be printed out on a single sheet of recording paper and data to be viewed on a single screen of a display.

14. (Previously Presented) The document data transmission device of claim 1, wherein the page data includes at least one of text data and picture data.

15. (Previously Presented) A document data transmission system of claim 9, further comprising:

summary data transmission request receiving means for receiving a summary data transmission request transmitted from the user terminal, requesting to transmit specific

summary data selected among the plural summary data pieces stored in the storage means,  
and

summary data transmitting means for transmitting the specific summary data  
to the user terminal, on the basis of the summary data transmission request received by the  
summary data transmission request receiving means.

16. (New) The document data transmission device of claim 1, wherein the  
specific summary data includes summary data for each page of each of the plural documents.

17. (New) A document data transmission method according to claim 6, wherein  
the specific summary data includes summary data for each page of each of the plural  
documents:

18. (New) A document data transmission system of claim 9, wherein the specific  
summary data includes summary data for each page of each of the plural documents.
